Education

Army Institute of Technology — Pune, India
Bachelor of Engineering in Information Technology — *2020 – 2024*

- CGPA: 8.7/10.0

Achievements

Meta Hackercup: Secured Rank 236 in global programming competition

LeetCode Guardian: Max rating of 2206 (Top 0.5 percentile). Profile: **HVCYM**

Codeforces Expert: Max rating of 1601. Profile: **HVCYM**

Credit Suisse Global Coding Challenge: Ranked in Top 50 globally

Coding Ninjas Contest: Secured Rank 11 in competitive programming contest

CodeChef 4-Star: Max rating of 1888. Profile: **himanshuyadav2**

Work Experience

Technology Associate — June 2024 – Present
ZS Associates — *Pune, India*

- Designed and developed scalable backend services using **Java 8+ and Spring Boot**, enabling high-performing pharmaceutical applications
- Built and maintained REST/JSON APIs integrated with client platforms, handling millions of daily transactions
- Implemented microservices architecture with **Spring Boot, Spring Batch**, improving modularity and scalability
- Developed persistence layer using **JPA and Hibernate**, ensuring optimized data access with Oracle and PostgreSQL
- Automated builds and deployments with **Maven**, Jenkins, and Docker, streamlining CI/CD pipelines
- Secured applications with **Spring Security and OAuth2**, ensuring HIPAA & FDA compliance
- Performed unit and integration testing with **JUnit and Mockito**, achieving 90%+ test coverage
- Mentored junior developers on Java backend best practices, design patterns, and clean coding standards
- Collaborated in Agile Scrum teams with QA and business stakeholders, delivering 15+ production-grade APIs

Skills and Technologies

Programming Languages: Java (8+), SQL, Python, C++, JavaScript, Kotlin (basic)
Frameworks: Spring Boot, Spring Batch, Spring Security, JPA, Hibernate
Databases: Oracle, MySQL, PostgreSQL, MongoDB, Redis
Big Data & Cloud: Apache Spark, Hadoop, AWS (EC2, S3, EMR, RDS), Docker, Kubernetes
Build & DevOps: Maven, Jenkins, CI/CD Pipelines
Web & App Servers: Tomcat, JBoss
Version Control: Git, Azure DevOps Services
Testing: JUnit, Mockito
Concepts: Microservices Architecture, RESTful API Design, Authentication & Authorization (OAuth2), System Design, Data Structures & Algorithms

Projects

Contact Manager | *ReactJS, JSON Server, Semantic UI*

- Developed a dynamic web application for contact management with full CRUD operations using ReactJS and JSON Server
- Implemented RESTful API integration with JSON Server for seamless data management and real-time updates
- Enhanced user experience with Semantic UI for responsive design and intuitive interface interactions

Social Media Trend Extractor | *ReactJS, Python Django, Beautiful Soup*

- Architected frontend interface using ReactJS for visualizing social media trends and analytics dashboard
- Collaborated on full-stack development integrating Python Django backend with web scraping capabilities using Beautiful Soup
- Implemented data visualization components for trend analysis and social media metrics presentation
